

## **RADIOLOGIC EVALUATION OF SPINAL INJURIES**

Assist. ***Ileana Muntean*** MD, assist. ***Rosana Manea*** MD  
Faculty of Medicine University Transilvania Braşov

The article wishes to bring a brief overview of radiologic methods used in the diagnosis of spine injuries, from simple (X-Ray examination), to complex (MRI), trying to draw attention on the information that each of these methods can bring to the quick and accurate establishment of the diagnosis.
