

AIR POLLUTION CAUSED BY ROAD TRAFFIC AND HEALTH

Mihaela Emandi MD
Authorities of Public Health Braşov

Environment protection issues in Romania and other countries are very acute, especially local intense pollution of natural environment caused by industry, agriculture and urban conglomerates as well as aboard pollution who lead in some areas to ecosystems disturbing and decreasing the welfare of large population. Despite the rules imposed by “National Strategy for Lasting Development”, air pollution caused by road traffic is still a problem of majority of towns.
